

2nd Annual Student Energy Summit

POWERED BY
blue planet
FOUNDATION

Nov. 11-12
(Fri & Sat)
Oahu

Aloha Educators, Students and Supporters:

We are excited to inform you that Blue Planet Foundation's 2nd Annual Student Energy Summit will take place on Oahu **on November 11 (Friday, Veteran's Day) through November 12 (Saturday), 2016**. Registration is now open to all middle school and high school students statewide. Travel stipend can be provided on first-come, first-serve basis. The widely successful Student Energy Summit is part of Blue Planet's Student Energy Innovation & Leadership Academy (SEILA) initiative. SEILA aims to empower youth across the state to take control of their energy future. At the center of these year-round educational efforts, the Summit is a signature event that frames education, conversation, and innovation on some of Hawaii's most pressing energy challenges and opportunities. During the summit, students will put their problem-solving skills into action through a design-thinking challenge. The challenge encourages critical thinking through a variety of lenses, including an understanding of economic and policy dynamics, as well as technological and engineering. To learn more, visit [Student Energy Summit 2016 Registration](#)

Schedule a Classroom Visit

As part of the Student Energy Innovation & Leadership Academy (SEILA), a Blue Planet Representative will visit your classroom to talk about Hawaii's Clean Energy Future and how each student can be part of it.

Register Now (Student Energy Summit 2016)

Registration is open to all middle and high school students. Go to [Student Energy Summit 2016 Registration](#)
Travel stipends are available on first-come, first-serve basis.

Energy Innovation Design Challenge

Student Energy Summit participants are eligible to enter the Energy Innovation Design Challenge. Check out last year's winner at [Energy Innovation Design Challenge](#)
